## COVID-19 Business Continuity Plan

1586 Swisco Road  
Sulphur, LA 70665

We intend to remain open and operational to support our customers in the chlorine manufacturing and pharmaceutical industries. Both sectors are crucial to the combating of infectious diseases.

### Current Precautions

We have educated our employees on COVID-19 symptoms, as well as, preventative measures.

We have set up hand sanitizer stations for 100% of our employees to use at the beginning of their shift, before their lunch break, and upon leaving our facility when going to a customer's facility. This requirement includes guests at our facility.

All common areas and high touch areas in our facility will be disinfected twice a day.

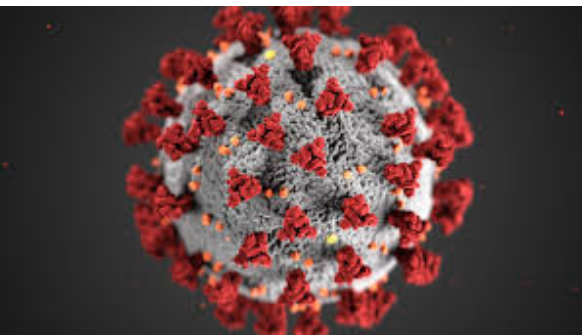

We will insist that our employees stay home when they are not feeling well to prevent the spread of germs.

We will be taking each employee's temperature at the beginning of each shift. If their temperature is higher than 100.4° F, they will be sent to get tested. If they test positive for COVID-19, they will not be allowed to return to work for 14 days.

If an employee tests positive for COVID-19, a deep cleaning will begin throughout the entire shop facility. The deep cleaning would begin at the work station of the affected employee and work to the rest of the facility.

## Employee and Visitor Screening

Each employee or visitor to our facility will complete this survey. If "yes" is answered to any question, they will not be allowed entrance.

1. Have you traveled to a CDC area of high COVID-19 concentration in the last 14 days?
2. Have you been in close contact with anyone who has been diagnosed with the coronavirus in the last 14 days?
3. Do you currently have any of the following symptoms: fever over 100.4° F, new onset of dry cough, shortness of breath or breathing difficulty, or tested positive for COVID-19?
4. Have you been asked to self-quarantine by any doctor, hospital, or health agency?

## Response Plan

If we experience multiple absentees due to the Coronavirus at local plant facilities we have multiple workers at our shop facility that can take their place. If we experience multiple absentees at our shop, we have a contingency list of 18 experienced fiberglass workers at our disposal. These workers have already worked at our facility during high-volume periods of business. Furthermore, we have business partners in the Baton Rouge area that we could tap for additional workers.

We are confident and ready to meet the challenges that face us today and tomorrow.
